

OBJECTS &
ILLUMINATION

BELLA FIGURA
THE WORLD'S MOST BEAUTIFUL LIGHTING

OBJECTS & ILLUMINATION

Objects & Illumination is a new collection for Spring 2026, a collection of sculptural vases, ornaments and lighting that explores the beauty of form, movement and material through Murano glass. From the fluid rhythm of wave and ripple textures to the precision of ribbed and battuto finishes, each piece balances traditional craftsmanship with contemporary design.

Accessories are often the final layer that brings a scheme together. A mirror introduces reflection and architectural rhythm; a vase or bowl adds sculptural punctuation, softening clean lines and creating subtle contrast. Through light, shadow and surface detail, these pieces enhance depth and dimension, elevating the space to a refined, elegant room.

Crafted in Murano glass, the collection reflects a heritage of artisanal expertise while embracing a distinctly modern aesthetic. The material offers a richness and luminosity that cannot be replicated. A subtle tonal variation, clarity and depth giving every object its own unique presence.

An entirely new range for the brand, Objects & Illumination introduces statement pieces designed to stand confidently within a space while remaining effortlessly versatile. Presented in a considered palette of refined tones, the collection compliments both contemporary and classic settings.

This collection also introduces a new 80cm diameter mirror size across all available designs, thoughtfully scaled to deliver presence without overpowering a space. Ideal for townhouses, city apartments, boutique hotels and yachts. Its proportions make it equally suited to refined residential interiors and considered contract environments, while adding architectural rhythm and sculptural emphasis.

The Concave Drum Chandelier is introduced in a new Fluted finish, handcrafted in Murano glass, handcrafted in Murano glass, celebrating the artistry and skill of traditional glassmaking. The nature of the process means no two pieces are ever identical, subtle variations in texture, clarity and surface detail make every chandelier entirely unique. This individuality enhances its sculptural presence, ensuring each installation carries its own character while maintaining the integrity of the overall design.

Complementing this new design, our signature Diamond Table Lamps and Carbon Boxes reinforce the cohesive material and sculptural language of the collection. Together, these elements create a dialogue between objects and illumination, combining statement lighting, sculptural form and considered detail to build interiors that feel layered, luminous and complete.

Bold yet refined, sculptural yet timeless, the collection introduces a new expression for the brand, one that celebrates, light, materiality and the art of considered detail.
